GS#2 - Healthy Babies, Moms & Communities: An Indigenous Perspective on Home Visiting, Health Professions, and the Communities We Serve

🕒 10:30 AM - 11:30 AM, Sep 20

Evidence-based care holds great promise. But many of the families and communities that could benefit most have been the hardest to reach. This session takes us beyond the home visiting model on a deeper look at the barriers, benefits, and best practices in connecting with and serving Indigenous and other underrepresented communities.

BO#2 - Reflections That Go Somewhere: Applying Motivational Interviewing in Dead-End Conversations

🕒 12:00 PM - 1:15 PM, Sep 20

Do you ever feel like your conversations with clients go around and around in circles? Have you ever responded with a great reflection just to get a short response or more of the same conversation? You are not alone. Practitioners using Motivational Interviewing often share that they find their conversations get “stuck” at some point.

Active listening alone does not lead to behavioral change. Recognizing a person’s change talk can help know how to respond intentionally, with the goal of steering the conversation toward change. We cannot change others, but we can use our conversations to help them verbalize their intrinsic motivation to change – their why and their how. By understanding how to choose intentional responses, you will be better able to evoke more of the client’s desire, ability, reasons, needs, and commitment to change.

GS#4 - Uplifting Birth: Equity Supporting Communities Affected by Maternal Morbidity and Mortality

🕒 10:00 AM - 11:05 AM, Sep 21

Studies on racial disparities in maternal mortality have shown rates of two to four times higher for African Americans and Native/Indigenous Americans, when compared to their White American counterparts. Lack of provider knowledge regarding impacts of implicit bias, interpersonal and systems of racism on perinatal mental and physical health prevents them from adequately addressing the needs of clients. This presentation will focus on increasing cultural conscientiousness and practices within the framework of equity, among nurses, when addressing the needs of clients and communities affected by maternal morbidity and mortality.

BO#5 - Sudden Shift to Telehealth: Lessons from the Colorado Experience

🕒 11:30 AM - 12:45 PM, Sep 21

The sudden shift to telehealth at the start of the COVID-19 pandemic created an opportunity to study nurse and client perceptions as well as client outcomes. In Colorado, we embarked on a study to evaluate this natural experiment among nurse-led models of care in rural and urban communities. In this presentation, we will share how research findings shaped an intervention to create and evaluate telehealth guidance for use by NFP home visitors. We will also share qualitative and quantitative findings describing client perspectives, utilization, and outcomes during the two years since the onset of the pandemic.

BO#8 - Voices on the Frontlines - Nurstory and Nurse-Family Partnership

🕒 10:00 AM - 11:15 AM, Sep 22

Nurse-Family Partnership (NFP) has been working with Nurstory for over two years now, providing workshops for NFP nurses, nurse supervisors and NSO staff to help process the stories they are living through, in, and with. This past year Nurstory initiated an innovative and comprehensive weekly online space for creative reflection, resiliency and wellness. In this session, you will learn more about the past, present and future of Nurstory, watch a couple of the stories made by NFP nurse and meet the storytellers for a panel and question and answer session.

BO#9 - To Fix or Not to Fix? How the Facilitating Attuned Interactions (FAN) Approach Can Help Us Decide

🕒 10:00 AM - 11:15 AM, Sep 22

The FAN (Facilitating Attuned Interactions) Approach serves as a framework for parent/caregiver engagement and reflective practice in home visiting. The FAN focuses on parents' urgent concerns and helps nurses tailor responses to match what parents need most in the moment. During this session you will explore strategies to support attunement with parents. You will recognize your own internal state of regulation and dysregulation to be fully present with families. You will consider factors to determine how to best partner with families as you think together, develop plans, and support parents as they take action.

BO#10 - Holding the Caregiver and Baby in Mind: Demystifying Perinatal Mood Disorders

🕒 10:00 AM - 11:15 AM, Sep 22

1 in 7 moms and 1 in 10 dads suffer from a perinatal mood disorder in the perinatal period. This session demystifies the realities and discusses the prevalence of perinatal mood disorders, along with the intersectionality of racialized trauma and stress. We will discuss how chronic stress can lead to perinatal mood disorder and the impact this can have on the parent-child relationship. Two case studies will illustrate intersectionality, the multi-layered nature of stress that can lead to perinatal mood disorder, and the impact of stress on parental reflective capacity with the perinatal caregiver.

GS#7 - Keynote Address NFP Nurses: Making and Being the Difference!

🕒 12:15 PM - 1:15 PM, Sep 22

This session will highlight the abilities of nurses in terms of how they delivered care with determination during the recent crisis. It will highlight new strategies nurses can own to revolutionize care delivery through building healthy work environments, diversify the profession with inclusive excellence, innovate care delivery models, improve overall well-being, sharpen their leadership skills, and feel empowered to be the difference in shaping the future of healthcare. Nurses finally have the spotlight and we must own the space we are in and lead. This session serves to inspire and motivate NFP nurses to do more and be more!
